PROFILE

I am a Passionate, dedicated, self-driven, and enthusiastic Software Engineer with experience in web development & full-stack applications. Strong problem-solving skills with expertise in React, Node.js, Firebase, and machine learning. Proven ability to work in teams and lead projects to success. Enthusiastic about building scalable and efficient applications to solve real-world problems.

EDUCATION

2021 – 2025

Bsc.(Hons) InformationTechnology
University of Moratuwa
CGPA: 3.28

2010 – 2018

G.C.E. Advanced Level Examination - 2019
Ruhunu Vijayaba College, Beliatta
Distict Rank - 50

PROFESSIONAL EXPERIENCE

September 2025 – April 2026

Software Engineer
Ariso Technologies
- Analysing customer requirements and contributing to the design and development of high-quality software solutions aligned with industry best practices.
- Debugging and resolving production issues, and providing technical support to internal teams to ensure stable system operations.
- Participating in full-stack development using Node.js, React.js, Firebase Database, and the AWS cloud services stack.

August 2024 – August 2025

Associate Software Engineer
Ariso Technologies
- Developing, testing, and maintaining application features across front-end and back-end components.
- Working on technically challenging tasks requiring problem-solving, critical analysis, and integration with cloud-based and distributed systems.

February 2024 – August 2024

Intern Software Engineer
Ariso Technologies
- Mainly worked on Curry King Admin Site to develop the initial requirements.
- Participating in full-stack development using Node.js, React.js, Firebase Database, and the AWS cloud services stack.

PROJECTS

December 2024 – April 2026

Curry King Customer Web - Ariso Technologies
Developed a customer web platform for online food ordering, account management, meal scheduling, and order tracking, providing users with a smooth and efficient food delivery experience.
- **Technologies: React js, Node, FireBase**
- **Role: Frontend Developer**

April 2024 – April 2026

Curry King Admin - Ariso Technologies
Developed an admin platform for managing orders, sales, menus, restaurant operations, delivery coordination, and daily business workflows for CurryKing.
- **Technologies: React js, Node, FireBase**
- **Role: Frontend Developer**

June 2024 – April 2026

Curry King Super Admin - Ariso Technolgies
Developed the centralized super admin platform used to manage overall business operations including restaurant management, user management, delivery operations, reports, configurations, and system-wide monitoring across multiple branches and services.
- **Technologies: React js, Node, FireBase**
- **Role: Frontend Developer**

January 2025 – April 2025

Curry King Task Manager System - Ariso Technologies
Developed a workflow management system to automate CurryKing restaurant operations, enabling supervisors to manage task assignments, food preparation workflows, and operational processes efficiently through a centralized platform.
- **Technologies: React js, Node js, PostgreSQL**
- **Role: Full Stack Developer**

SKILLS

Web Development
- React
- Bootstrap
- Node js

Programming Languages
- Java
- C

DBMS
- MSSQL
- MySQL
- Fire Base

Version controlling
- Git

CERTIFICATES

- .Net Foundation
- SQL (Basic) Certificate
- Introduction to AWS
- JavaScript
- Java
- Python

EXTRA CURRICULAR ACTIVITIES

- Former Captain of University & School Volleyball Team
- Member of School Cricket Team, Elle Team & Athletic Team
